Tidy Car, Enjoyable Riding Experience!

Most people often find themselves throwing stuff on the floor of their car, or worse -- out the window because they don't have any bins in their cars. Left unattended, your car will be dirty which is not good for your health. You might also develop a dangerous habit of *littering*, that will probably be copied by your kids. Worst of all, you'll find that none of your friends will be excited to get a ride with your messy & smelly car!

Fortunately, we have a solution for you. Rather than spending hours cleaning your car from the mess, you can keep everything clean & tidy by using our car bin. You'll never get caught with a messy car ever again. Keep your fast food wrappers, empty coffee cups, and used napkins out of sight by throwing it into our handy car waste bin.

- **No Fuss Installation:** Simply attach the adjustable strap of our car waste bin around your car's centre console or the headrest, and you're good to go.
- **Generously sized:** You can easily fit large items such as water bottles, food boxes, and other car waste in our 36Lx25Wx15D cm (~5L volume) waste bin.
- **Leak-Proof:** Throw away liquid waste without worry because our car bin is equipped with a leak-proof removable liner that protects your car from spills or stains.
- **Extra side pockets:** Put napkins, water bottles, and any other items on the mesh pockets located at the right and left side of the bin for easy access.
- **Perfect for car nomads:** This car organizer is especially useful for parents, people who commute to work, and travellers who spend a lot of time in their car.
